Subject to conditions prescribed by the University of California, Los Angeles, sealed bids for a lump sum contract are invited for the following work:

SKIDATA PAY MACHINES INSTALLATION
Project Number 907057.01

DESCRIPTION OF WORK: The project consists of an upgrade to the existing software and components of the end-of-life Skidata parking equipment throughout Medical Building and Medical Plaza parking structures (MP100, 200 and 300), Jules Stein, Ronald Reagan Hospital and Luskin Conference Center and the provision of additional pay machines as well as new License Plate Recognition (LPR) at each entry and exit lane at every structure.

The upgraded system shall include a camera and light with wiring in conduit set back approximately. 50' from the existing gate arms in order to capture the license plates for faster processing upon exiting.

Medical Plaza level B1 shall be re-striped (areas adjacent to MP100, 200 and 300) to integrate all parking stalls onto the same ticketing system (Skidata) with traffic reconfiguration. Unused booths where personnel were previously staffed and stationed shall be removed.

The Skidata systems currently allow for operation of the parking gate arms, ticket dispensers and receivers and payment system used for parking in the project locations mentioned. The system also provides cash and credit card payments for customers visiting UCLA to ensure a smooth process entering and leaving the site. The Skidata system houses the main server for communication and transactions.

Due to the high traffic use by patients, visitors and staff, all work shall be limited to nights and weekends. The work shall be sequenced in order to keep the system operational.

The estimated construction cost is \$4,117,000.00.
