Re: Peer Review Conclusions for UCLA Capital Programs Building Seismic Strengthening

Dear Mr. MacDougal:

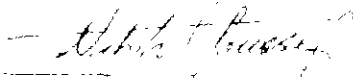

In regards to the proposed seismic strengthening presented by Englekirk & Sabol Consulting Engineers, Inc., we have presented our comments in the September 16, 2003 and January 5, 2004 letters. Subsequently, we have reviewed the responses from Englekirk & Sabol Consulting Engineers, Inc. for the proposed seismic strengthening, including the following:

- Architectural and Structural Drawings; prepared by Englekirk & Sabol Consulting Engineers, Inc., dated December 12, 2003.
- Specifications, prepared by Englekirk & Sabol Consulting Engineers, Inc., dated December 12, 2003.
- Structural Calculations, prepared by Englekirk & Sabol Consulting Engineers, Inc., dated September 2, 2003.
- Geotechnical Investigation Report, prepared by Harding Lawson Associates, dated August 10, 1987.
- Structural Peer Review Response; Englekirk & Sabol Consulting Engineers, Inc., dated January 26, 2004.

Based on the above documents and additional clarifications through phone conferences, all our concerns are adequately addressed. We have no further comments on the design and once implemented the building will meet the requirements for a "Good" rating per the UC Seismic Safety Policy guidelines.

Thank you for your attention. Please do not hesitate to call should you have any questions.

Sincerely,
NABIH YOUSSEF & ASSOCIATES

Nabih Youssef, S.E.

Just thought you might want to see this letter from the peer reviewer confirming that the proposed corrections will result in a "Good" rating. I will also ask Tom Sabol for a similar letter.

John
