

ADVERTISEMENT FOR BIDS

Subject to conditions prescribed by the University of California, Los Angeles, sealed bids for a CM at Risk contract are invited from prequalified CM/Contractors for the following work:

MP200 Emergency Power Equipment Replacement
Project Number 906020.01

DESCRIPTION OF WORK: This project will replace the obsolete emergency power system at 200 Medical Plaza (MP200), also known as the Peter Morton Medical Building. The project will include the removal, decommissioning, and replacement of two existing 1000 kW emergency diesel generators along with their associated controls. The existing load banks will also be removed and replaced with new resistive load banks sized to match the new generator capacity. To support the new equipment, the existing day fuel tank will be decommissioned and replaced, and the diesel exhaust treatment system will be upgraded to comply with current South Coast Air Quality Management District (SCAQMD) requirements. In addition, seven Automatic Transfer Switches (ATS), the paralleling switchgear, and all associated conductors currently distributed throughout the building will be removed and replaced in their entirety. A new equipment platform will be constructed to support the generators, while temporary cabling routed into the B-level central plant and roof-level electrical room will be properly weatherproofed and fireproofed.

The scope also includes modifications to the existing roof structure to accommodate new loads. This will require removal and replacement of the roof membrane, insulation, substrate, drains, and waterproofing in all areas affected by the work. An expansion of the existing roof opening will be carried out, including the installation of new structural framing to support a new roof hatch and ladder. Structural strengthening will be incorporated as required, along with new roof curbs for the equipment.

Finally, the project will address the restoration of interior components impacted by construction, such as fire sprinkler systems, HVAC components, ceiling finishes, wall and ceiling repairs, and painting. Ancillary components necessary for a complete, fully operational, and code-compliant system including new breakers for the paralleling switchgear, will also be replaced as part of the work. The abatement of Hazardous Materials is required.

CM/CONTRACTOR FURNISHED EQUIPMENT: The CM/Contractor shall furnish all equipment listed in Exhibit 33, or equal. Bidders shall bid the cost to furnish all equipment listed in Exhibit 33 in the space provided on the Bid Form. Furnishing of listed equipment includes, but is not limited to, furnishing, insuring, ordering, receiving, storing, protecting and delivering all CM/Contractor Furnished Equipment identified in the Contract Documents.

The installation of the equipment will be bid in Bid Packages.

The Anticipated Contract Value is \$14,889,264

BIDDING DOCUMENTS:

1. Bidding Documents will be available beginning on October 15, 2025, and will be issued at:
UCLA Online Planroom
Website: <https://www.uclaplanroom.com/>
2. Bidders may view the Bidding Documents online at the UCLA Online Planroom website and download the documents at no cost to user.

PREQUALIFIED CM/CONTRACTOR BIDDERS: University has prequalified CM/Contractor Bidders for this Project and posted a list of said firms on the UCLA Online Planroom website.

PRODUCT SUBSTITUTION DEADLINE: For those products, materials and equipment designated in the Bidding Documents as requiring evaluation of substitution prior to submittal of bids, requests for said substitutions will only be accepted at the following location. Only substitution requests submitted by Prime Contractor Bidders will be considered:

Contracts Administration
University of California, Los Angeles
1060 Veteran Avenue, Suite 125
Box 951365
Los Angeles, California 90095-1365
